

K-Rain Nozzle - Adjustable

RGK0360

Details

K-Spray pop-ups and nozzles are designed to provide a steady, consistent fall-out of water in 3", 4", 5" and 6" pop-up heights, K-Sprays can be used with K-Rain's 12 interchangeable fixed nozzles or K-Rain's adjustable nozzles. K-Spray pop-ups are ideal for watering small grass areas, ground cover or shrubs. A shrub adapter is available for use with K-Rain nozzles and can be threaded directly on to an above ground riser. K-Spray pop-ups include a stainless steel retraction spring for reliable retraction in all soil conditions. A friction clutch ring allows the pop-up riser to be turned to direct the water flow. K-Spray pop-ups have a 1/2" NPT female thread inlet. Nozzles have male threads. (12.7mm) per hour nozzle trajectory: Standard 260, low angle 120. Available in 12' and 15' models.
