

Lake Builder Booster Sock

RP95412

Details

A highly formulated blend mixture enhanced to stimulate the growth of natural bacteria. The sock is essential for water that has been heavily treated with herbicides and algaecides resulting in haze, green, algae and algae bloom water. The Booster Sock is placed in the water to allow the release of "good" bacteria while absorbing unwanted bacteria from dead plants, insects and waste from pond creatures. This 1 lb sock will treat 500,000 gallons of water.
